

Annual Nesting Data Report for 2025

By Steve Fallon

Data Report for 2024 By Steve Fallon

The final numbers for our 2024 bluebird fledglings are in, and the birds are still on the comeback trail! Our monitors reported 17,660 EAB fledglings for 2024 and that is over 16% higher than the number of birds fledged in 2023. I've included maps to show where in the state the numbers came from.

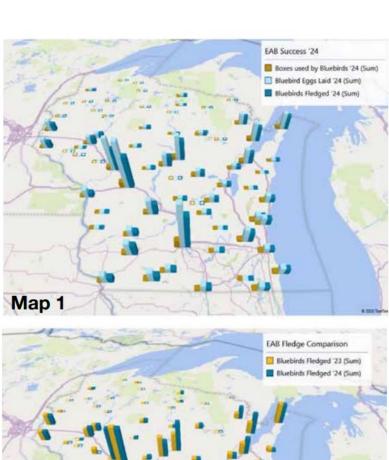

The first map shows our 2024 Bluebird numbers by county. The numbers of boxes used by bluebirds, eggs laid, and bluebirds ultimately fledged are indicated by the height of the bars in the graph, with colors corresponding to the category in the legend.

The next map shows a comparison of the 2024 fledged EAB numbers compared to the 2023 values. In many areas we saw the same numbers or decent increases in bluebird fledges. As expected, some monitors reported very good success, but others reported that the birds had another tough year. The cool, wet spring contributed to some of the problems observed. So overall, we saw some improvement, but like last year, it was spotty in terms of location. As expected, the recovery is still underway. In 2024, we had about 3% more boxes in play which might lead one to assume a three percent improvement. However, the placement of those houses and increased numbers of birds led to nearly a 22% increase in the number of "houses used by bluebirds" from the prior year.

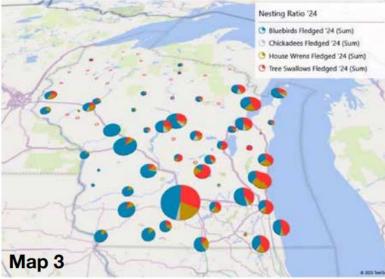

The final map is a pie chart that indicates the relative numbers of bluebirds compared to the other cavity nesters that share the bluebird boxes. The total number of all cavity nesters fledged for 2024 was 31,744, which is about 2% above of the total number of cavity nesters we had in 2023. Due to some BRAW initiatives with landholders in southewestern Wisconsin, we saw some significant EAB improvement from that area, as well as some from our northeastern Wisconsin counties. Tree swallow and chickadee numbers were down slightly, around 97% of the '23 numbers. The wren numbers were 72% of the '23 numbers. However, many monitors don't record wren numbers, so that could skew those results.

We want to recognize our monitors for their hard work. We had nearly 300 reports from our monitors that yielded 17,660 bluebird fledglings. A nice bump this year!

Thanks, all for your hard work! As always, please feel free to contact me with corrections or omissions.
